Your reference matters.

THE ORIGINAL

All ten examples use this same uploaded photo as the identity reference. Outfits, backgrounds and lighting change between styles.

Choose a clear, well-lit photo with your entire face visible. Avoid beauty filters, sunglasses and heavy shadows.

01 Upload your photo

Start a new image request in ChatGPT and attach your original portrait.

02 Copy one complete prompt

Use the full prompt on any of the next ten pages. Each includes face-preservation instructions.

03 Review, refine and crop

Compare the result with your original. Check facial shape, eyes, nose, beard and skin tone before using a circular crop.

AI edits can still alter facial details. These examples demonstrate a style direction, not a guarantee of identical results. If the face drifts, reattach the original and ask to restore its features without changing the style.
