CLAUDE CODE · LEMO OPUSCAR · 99 STYLES

Make animated films with Claude.

No camera. No AI video model. 100% code.

ഒരു video പോലും shoot ചെയ്യാതെ, ദിവസവും post ചെയ്യാൻ animated films. Full step-by-step guide.

5 **steps in this guide:** Install → Pick a style → Ask for the film → Make it Instagram-ready → Post every day. Plus copy-paste prompts and the full list of 99 styles.

BEFORE YOU START

What is Lemo Opuscar?

A free, open-source **skill for Claude Code** made by LemoLab. It gives Claude **99 film styles** (watercolor, pixel game, old cartoon, Ukiyo-e, tiny toy city, neon, chalkboard…). You pick a style and give a story. Claude then works like a small studio: it writes the story beats, draws every frame in code, makes original music, adds narration and mixes it all into an MP4.

Every style has a demo film. Watch them in the gallery before you choose.

What you need

- ✓ **Claude Code** on your computer (needs a paid Claude plan). The repo is built for Claude; Fable, Opus and Sonnet all work.
- ✓ Set effort to high. In Claude Code type `/effort high`
- ✓ **Node 20+**, **ffmpeg 7+** and **Python 3.11+** (or uv). Claude installs everything else.
- ✓ Time: about **30–60 minutes per film**, and a fair amount of usage/tokens. Start with short films (30–45 s).
- ! 3 styles (Manga Panels, Text Flash Cuts, Comic History Cartoon) also need an image generator. The other 96 work without one.

Check your tools (Mac / Linux terminal)

```
$ node -v       # v20 or higher
$ ffmpeg -version # 7 or higher
$ python3 --version # 3.11 or higher
```

Tip: Missing one? Open Claude Code and just say *"Install Node 20, ffmpeg 7 and Python 3.11 for me"*. On a Mac it will usually use Homebrew. ഒന്നും manual ആയി ചെയ്യേണ്ട.

01 Install the skill

രണ്ട് line command paste ചെയ്താൽ മതി.

Open your **Terminal** and paste these two lines:

```
$ claude plugin marketplace add lemomo-ai/lemo-opuscar
$ claude plugin install lemo-opuscar@lemolab
```

That's it. Now open Claude Code from any folder:

```
$ mkdir my-films && cd my-films
$ claude
```

On first use it downloads its guides, tools and style prompts to `~/lemo-opuscar`. Each film you make is saved in the folder you started Claude from.

Not sure what to ask? Start the guided mode

```
> /lemo-opuscar:lemo-opuscar
```

It asks which language you want, then lets you choose: a film in a library style, make a style your own, or use a style you saved.

Option B: clone the repo instead

```
$ git clone https://github.com/lemomo-ai/lemo-opuscar.git
$ cd lemo-opuscar
$ claude
```

Update later

```
$ claude plugin marketplace update lemolab && claude plugin update lemo-opuscar@lemolab
```

Then restart Claude Code. For auto-updates: type `/plugin` → Marketplaces → lemolab → Enable auto-update.

02 Pick ONE style

നിങ്ങളുടെ page-ന് പറ്റിയ ഒരു style മാത്രം. അതാണ് page-ന്റെ identity.

Open the gallery ↗. The 99 styles sit in 15 groups by how the picture looks. Every style page has a demo film, stills, what it suits and the exact sentence to copy.

Which style for which page?

YOUR PAGE	TRY THESE STYLES
Kids stories, moral stories	Crayon Picture Book · Paper Pop-up Book · Watercolor Brush · Crayon World 3D
Kerala travel, food, culture	Watercolor Brush · Urban Sketch · Tilt-Shift Miniature · Silkscreen Travel Poster
Myths, history, folk tales	Shadow Puppetry · Ukiyo-e · Woodcut Print · Stained Glass · Comic History Cartoon
Tech, AI, how-it-works	Whiteboard Explainer · Blueprint · Isometric Infographic · Dark Tech Keynote
Facts, science, education	Chalkboard · Sketchnote · Under the Microscope · Colored-Pencil Science
News, money, data	Caption News · Data Storytelling · Spreadsheet Film · Transit Map
Gaming, fun, memes	16-bit Pixel RPG · Microgame Frenzy · 1930s Rubber Hose · 80s Cel Anime
Products, brands, launches	Glass Product Render · Swiss Motion Graphics · Brick Toy · Neon Tubes

The rule: one style + one topic, every day. When every post looks the same, people recognise your page in the feed before they read the name.

Full list of all 99 styles: pages 9–10.

03 Give Claude a story

ഒരു sentence മതി. Claude വരയ്ക്കും, music ഇടും, narrate ചെയ്യും.

Formula: **length + style + format + story + voice**. Copy one of these into Claude Code and change the story.

1 · Simple

```
Make a film in the Watercolor style about a fisherman's morning on Vembanad lake.
```

2 · Instagram Reel (vertical)

```
Make a 40-second vertical film (1080×1920) in the Crayon Picture Book style about a boy in a Kerala village who plants a mango seed. Warm male narrator. Big, simple shots that read on a phone.
```

3 · With your own Malayalam voiceover

```
Make a 45-second vertical film (1080×1920) in the Ukiyo-e style. I have my own Malayalam voiceover: vo.mp3 in this folder. Use it as the narration and time every scene to it. No other narrator.
```

4 · Explainer

```
Make a 50-second film in the Whiteboard Explainer style: how UPI moves money from your phone to a shop in 2 seconds.
```

5 · See the plan first

```
Make a 30-second Tilt-Shift Miniature film about Kochi Metro at rush hour. Show me a storyboard first.
```

Before it starts, Claude asks once about anything it can't decide, whether you have your own voice/music/photos, and whether you want a storyboard. Answer, then let it run (30–60 min). Default size is 1920×1080, so **always say 1080×1920 for Reels.**

WHILE IT WORKS

What Claude does for you

Claude reads three guide files, then works like a small film studio:

01 **DIRECTOR.md**: story, sound, rhythm, camera, performance, self-checks

02 **TECHNIQUE.md**: frame-by-frame rendering, voice, music, mixing

03 **styles/<style>/STYLE.md**: what that style looks and sounds like

The pipeline

1 Script
Story beats and narration from your one-line idea.

2 Draw
Canvas / WebGL pages drawn in code, one frame at a time.

3 Music
An original score built from free sample libraries.

4 Voice
Text-to-speech narration, or your own voice file.

5 Mix
Voice, music and sound effects mixed together.

6 Render
An MP4 in your film folder, ready to post.

Fix anything with one message

```
Make the narration slower and add 2 seconds of silence at the end.
Change the boy's shirt to red in every shot.
The middle part is boring. Cut 10 seconds and make it faster.
Remake it at 1080×1920 for Instagram.
```

Keep the session open until you're happy. Claude still knows the film, so small changes are quick. For a new film, start a fresh chat.

04 Make it Reel-ready

Malayalam audience-ന് വേണ്ടി ചെറിയ മാറ്റങ്ങൾ.

Malayalam voice

For a Malayalam narration, the easiest route is your own voiceover file. Write the script (Claude can write it for you), then record it on your phone or make it in ElevenLabs. Put the file in your film folder and use prompt 3 from page 5. Claude times the scenes to your voice.

```
Write a 40-second Malayalam narration for this story. Short lines, simple
words, a strong first line. Give it to me before you make the film.
```

Reel checklist

- ✓ **1080×1920**, 30–45 seconds
- ✓ **First 2 seconds** must move: open on the most striking shot, not a title card
- ✓ Ask for **big, bold subtitles** kept away from the bottom ~20% (Instagram's caption area) and the right edge (buttons)
- ✓ Voice **loud and clear**. Ask Claude to keep music low under the voice, so it can be heard on a phone speaker outdoors
- ✓ End on a question or a "follow for part 2" line

```
Add big Malayalam subtitles from my script, 2-4 words at a time, inside the
middle of the screen. Keep the voice loud and the music ducked under it.
```

Credit line: if you post the library's own demo films or stills, credit "Lemo-Opuscar by Lemomo (LemoLab), CC BY 4.0". Films **you** make with the library are yours, client and commercial films included, no credit needed.

05 Post every day

ഒരു style. ഒരു topic. എല്ലാ ദിവസവും.

Batch it: write 7 one-line stories on Sunday and make 1–2 films a day. Example week for a **Kerala folk tales** page in Shadow Puppetry:

MON	Why the crow is black: a short folk tale
TUE	Mahabali's one visit a year
WED	The coconut tree that wouldn't bend
THU	The fisherman and the golden fish of Kumarakom
FRI	The elephant who was afraid of the drums
SAT	Part 2 of your best-performing story
SUN	Ask followers in comments: "Next story?" and make the winner

```
Give me 30 one-line story ideas for a Malayalam kids page in the Crayon
Picture Book style. Each must work as a 40-second film with one clear twist.
```

Make a style your own (brand look)

Want your brand colours, logo or a recurring character? Ask:

```
I want to change the Ukiyo-e style into my own version: Kerala backwaters,
lime-green accents, my logo in the corner.
```

Claude asks a few questions, shows one style frame side by side with the original, makes a 15–30 s demo, then saves it in `~/lemo-my-styles/`. After that: *"Make a 30-second film in my Kerala Ukiyo-e style about..."*

ALL 99 STYLES · TAP A NAME TO SEE ITS FILM

The style list

Use the name exactly as written in your prompt.

01 · Edit & Documentary 8

Caption News · 1920s Newsreel · Live Countdown Split-screen · City Symphony · Visual Investigation · Constructivist Montage · Sports Telestrator · Broadcast News Package

02 · Painting & Illustration 5

Crayon Picture Book · Watercolor Brush · Impasto Oil Painting · Urban Sketch · Pen & Wash · Colored-Pencil Science Illustration

03 · Sketch & Board 7

One-line Drawing · Whiteboard Explainer · Chalkboard · Sketchnote · Stick-figure Explainer · Tablet Sketch Explainer · Marker on Paper

04 · Traditional Crafts 7

Chinese Ink Wash · Shadow Puppetry · Ukiyo-e · Red Paper-cut · Paper-cut Lightbox · Stained Glass · Gilded Illumination

05 · Print & Printmaking 8

Risograph Print · Halftone Dossier · Woodcut Print · Copperplate Engraving · Silkscreen Travel Poster · Scratchboard Long Take · Pop Art · Vintage Engraving Collage

06 · Graphic & Type 8

Swiss Motion Graphics · 60s Spy Title Sequence · Art Deco · Pictogram Motion · Bauhaus Shapes · Scale Zoom Explainer · Text Flash Cuts · Silhouette Rhythm

07 · Line Diagrams 8

Blueprint · Isometric Infographic · Exploded Teardown · Line-Art Cutaway · Color-Coded Mechanism · Instruction Manual Art · Pen Plotter · Assembly-Line Diagram

08 · Cartoons 6

1930s Rubber Hose Cartoon · 80s Cel Anime · Sci-Fi Sitcom Toon · Mid-century Cartoon · Comic History Cartoon · Manga Panels

ALL 99 STYLES · CONTINUED

09 · Games 4

16-bit Pixel RPG · 2.5D Pixel Art · Microgame Frenzy · Rhythm Game Show

10 · Film & Tape 5

CRT ASCII Terminal · 1920s Silent Film · Liminal Found Footage · Scratch Film · Double Exposure

11 · Screens & Interfaces 6

Dark Tech Keynote · Mascot Screencast · Sci-fi Hologram HUD · Tabletop App Flythrough · Spreadsheet Film · 1-bit Dither

12 · Light & Lines 5

Circuit Board · Firefly Pointillism · Flow-field Wind Lines · Oscilloscope Math · Neon Tubes

13 · 3D & Miniature 8

Brick Toy · Paper Pop-up Book · Tilt-Shift Miniature · Low-poly Isometric Island · Glass Product Render · Memphis Diorama · Isometric People Scene · Crayon World 3D

14 · Instruments & Evidence 8

Satellite Briefing · Engineering Briefing Board · LiDAR Survey · Under the Microscope · Archive Light Table · Security X-ray · Radar Sweep Documentary · Thermal Camera

15 · Data & Maps 6

Data Storytelling · Projection-Mapped Model · Data Physicalization · Transit Map · 3D Map Explainer · Blob Simulation

✦ **Needs an image generator:** Manga Panels, Text Flash Cuts, Comic History Cartoon.

IF SOMETHING GOES WRONG

Quick fixes

PROBLEM	FIX
"ffmpeg too old"	You need ffmpeg 7+. On Mac: `brew upgrade ffmpeg`. Or ask Claude to install a newer build.
Film looks wrong / off-style	Use a Claude model with `/effort high`. Name the style exactly as in the gallery.
Video is landscape	Default is 1920×1080. Say **1080×1920** in your prompt.
Hit usage limits	Make shorter films (30 s), or ask for a storyboard first so fewer redos are needed.
Manga / Text Flash / Comic History won't start	These 3 need an image generator. Pick any other style.
Skill not found	Run the two install lines again, then restart Claude Code.
Still stuck	Open an issue on the GitHub repo ↗
